The Leading
Conversational AI
Platform For
Hiring Teams

The Leading Conversational AI Platform

Mya uses natural dialogue to build trust and confidence, instantly engage candidates and continuously communicate throughout the entire recruiting lifecycle.

Outreach Automation

Scale your sourcing efforts by automating outreach to your existing talent pool.

- Nurture talent through recommendations
- Target and schedule candidates
- Refresh existing candidate profiles
- Automate referrals

Career Site Engagement

Engage and convert job seekers on your career site through a goal-oriented chat experience.

- Suggest relevant openings
- Convert active job seekers
- Easily answer FAQs
- Build candidate profiles

Recruitment Process Automation

Accelerate communication and conversion across the end-to-end recruitment life cycle.

- Instantly engage candidates from all application sources
- Screen all applicants and shortlist best-fit candidates
- Automate the entire scheduling and coordination process
- Bridge communication gaps with ongoing guidance

Post-Hire Engagement

Deliver a personalized employee experience to ensure employees are set up for success.

- Perform periodic check-ins and FAQ support
- Keep employee profiles and interests up-to-date
- Promote internal mobility with job recommendations
- Proactively redeploy contractors to their next job

“I really enjoyed the experience chatting with Mya. It has been one of the easiest and simplest applications I have done so far! It really stands out!”

Build Candidate Relationships

Mya helps companies engage instantly with candidates, reduce the recruiting “black hole” and build lasting relationships.

- ✓ Capture candidate interest and qualifications to effectively connect with the right opportunity
- ✓ Instant engagement on career site, or through various messaging channels (SMS, WhatsApp, Messenger, Webchat)
- ✓ Improve employer brand with candidates and applicants through continuous and timely communication

Mya Systems

Mya is the leading conversational AI recruiter. The solution helps hiring teams scale their sourcing efforts, screen and shortlist large applicant pools, automate the scheduling process, provide onboarding and HR support, and deliver a world-class candidate and employee experience. Mya applies proprietary natural language and machine learning techniques to have open-ended, natural and

dynamic conversations, gather deep candidate insights, and build trust and confidence with its users. The technology interacts with candidates through SMS, WhatsApp, and other messaging applications and can be embedded into your career site and application process. Mya is highly configurable, speaks multiple languages, and can be seamlessly integrated into your ATS, CRM, and calendar systems.
